50X1-HUM

1. During April 1953, the quantity of electrolytic copper produced at Kupfer- und Messingwerke, Hettstedt (SAG Marten), was 278.3 metric tons. During the same period, 2.1 tons of nickel were produced.
2. The experiments with the production of electrolytic copper from foundry metal without resmelting, now being carried out at the plant under the direction of Dr. Bergart, are not proving successful. One furnace has already been ruined as a result, but the experiment is being continued.
